

Energy Management Policy

For Godrej Industries Limited
February, 2018

Version 1.0

At Godrej Industries Limited (GIL), we are committed to conserve energy and take all possible steps to mitigate the risk of climate change. By 2020 we endeavor to reduce our specific energy consumption by 30% from our base year 2010.

In line with our sustainability vision of 2020, we are committed to the following:

- Reducing specific energy consumption by moving towards energy efficient equipment, utilities and process modifications
- Promoting renewable energy to mitigate climate change impacts
- Adhering to all applicable laws
- Adopting life cycle thinking at the design stage
- Training our team members on all aspects of energy management relevant to their roles. We also strive to educate our suppliers, business partners, customers and stakeholders regarding the responsible handling and use of our products.

The policy applies to all GIL business units, the entities we own, and the entities in which we own a majority interest, as well as all associated employees.

Across our diverse and extended supply chain, we prefer suppliers and business partners that have similar policies and practices, and include relevant expectations in our contracts with them. For those suppliers who do not have similar policies and practices, we encourage and support them to do so. Active engagement and collaboration based on transparency, corrective action, and continuous improvement are hallmarks of our approach.

Oversight

The Executive Director supported by the Head – Marketing, Supply Chain and Production, oversees our waste management commitments. The Executive Committee provides Board level oversight

Nitin Nabar

Executive Director and President
Godrej Industries Limited
